

Logan Shehane

 SentientDragon5 |  lashehane |  Demos |  lashehane@outlook.com

SUMMARY

Software Engineer and incoming M.S. Computer Science student at UC San Diego with hands-on experience spanning game development, robotics, computer vision, and AI/LLMs. Proven record of leading technical projects, co-authoring FDG-published research, and releasing a complete Godot game on Steam.

EDUCATION

M.S. Computer Science at UC San Diego Sept 2026 - June 2028 (Expected)

B.S. Computer Science: Game Design at UC Santa Cruz (GPA: 3.94) Sept 2022 - June 2026

- Capstone: Led a 7-person team to build and release *AstroFrame* (spaceship builder/combat game in Godot) on Steam
- Focus areas: Procedural Generation, Artificial Intelligence, LLMs, Computer Vision, and Robotics
- Well-rounded knowledge across multidisciplinary topics including Sailing, Paleontology, and Music

EXPERIENCE

Engineering Game Lab Manager – UCSC Baskin Engineering Lab Support Sept 2025 - Aug 2026

- Supported capstone projects and facilitated community.
- Maintained lab space and equipment.

Software Development Intern – Guide Robotics (Tokyo, Japan) June 2025 - Aug 2025

- Configured ROS and Gazebo environments to simulate a TurtleBot 4, successfully integrating both the digital twin and physical robot with internal software tools.
- Researched and implemented a YOLO-based computer vision model for object identification on a Qualcomm RB3 Gen 2 Development Kit.

Software Researcher – UCSC Procedural Generation Lab Sept 2024 - June 2025

- Programmed scripts to generate procedural worlds using algorithms like Wave Function Collapse.
- Compiled several datasets for use in training Large Language Models and fine-tuned LLMs.
- Co-authored a conference paper published at FDG, contributing to research and technical details.

Tutor and Grader – UCSC Baskin School of Engineering Sept 2024 - June 2025

- Conducted weekly meetings with students to instruct on the use of 3D modeling software.
- Developed teaching materials, graded work, and provided feedback to students.

Independent Contractor – Turbostrat LLC Mar 2024 - Apr 2024

- Designed an interactive UI and tutorial for mobile AR game.
- Planned, implemented, and documented software and design.

Robotics Club Team Lead – UCSC Slugbotics Arm Team Sept 2023 - June 2025

- Engineered an open-source robotic arm; maintained and expanded the codebase.
- Organized meetings, demonstrated progress, and onboarded new members.

SKILLS

Languages Python, C# (Unity), C, C++, Javascript, HTML, CSS

Technologies Unity, Godot, Blender 3D, LLMs, APIs, Git, Unix, ROS2, Gazebo, OpenCV, YOLO, RViz

Awards Dean's Honors, Eagle Scout
